About our Guests

Michelle Desiderio leads the NAHB Research Center's national green building program based on the ANSI-approved National Green Building Standard™ (ICC 700-2008). The program includes training and accreditation of Green Verifiers and certification of single family, multi-family, renovations, additions, and land development. As a related service to product manufacturers, the Green Approved Products program pre-approves certification points for products that meet green building practices.

As the Program Manager of Energy Efficiency at the NAHB Research Center, **Amber Wood** oversees engineering research projects focusing on the energy performance of residential construction. She is primarily involved with the NAHB Research Center's DOE Building America team to develop energy solutions for new and existing homes.

Drew Hastings is a renowned comedian and a frequent guest of The Bob and Tom Radio Show. His acting talent has landed him a number of guest-starring roles, and he has done television pilots for some of the big networks including Fox, NBC, and HBO. He has also made many stand-up appearances on television and is one of a very elite group of comedians to have received a standing ovation on *"The Tonight Show."*
